

Investment Strategy

Do you want to retire soon, but you do not have enough funds? Our system is the solution. Invest USD 1000 and in 10 years the capital can increase to USD 1 mio. Impossible?, not with the right money management and a safe strategy. We have a monthly target of 6%. Do you think not a big profit? Wrong, because with 6% monthly average profit, in 10 years you can make 1 mio from a starting capital of USD 1000. How? By compounding the profits, and starting with 1000 and by following our money management exactly. When we reach higher account equity, we increase the traded lots. So we can reach the dream of 1 mio. Join us and enjoy a prosperous future. Our strategy is based on technical analysis, we will have months with more profits, other with less, perhaps from time to time a losing month. But no problem, with our safe strategy we will be back on track always very soon.

Portfolio Performance

I have an experience of more than 7 years in the Forex Market, before I worked for a Swiss Bank as Investment Manager. I have tested hundreds of systems. I am a full time trader, I have several personal accounts where I am using the same strategy with the same target of 1 000 000 in 10 years. I am a new manager of Yadix, so I cannot show a long track record, but you can follow my actual trading and take a decision (report below).

Medium Risk:

Following our Money Management (does not increase risk!), all trades with stops, wide stop= lower lot size, tight stop= higher lot size.

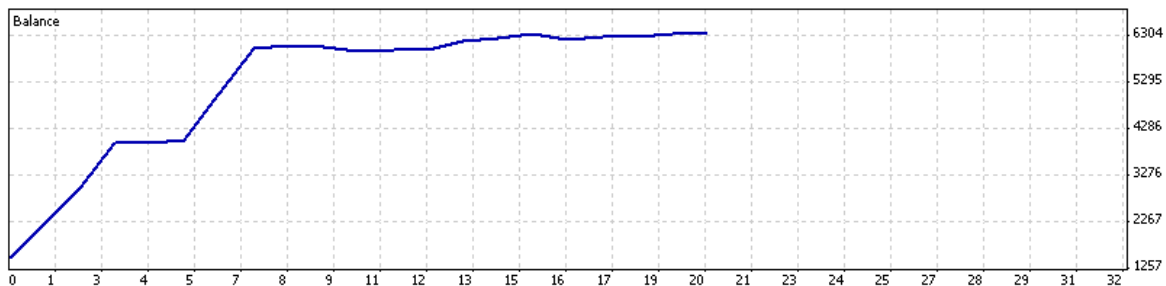

Expected returns: 6 % monthly, 100 % yearly based on compounding
