

Investment Strategy

DiWs fund (DiWs)system strategy has been built in 2014.From March 2014 working on a real money accounts. System is built specially for low risk trading portfolio. DiWs is an automatic system.

Diws trades on 4 pairs – EURUSD, GBPUSD, USDJPY and USDCHF. Integrated Money Management system automatically set necessary lot depending on deposit without trader interference.

Trading system open trades using retrace momentum. Usually it is trade in night time (GMT) or after big market movements.

Risk Management

DiWs has a 1 level risk management system to protect invested funds. One trade risk level is set to 3%. In recovery period it can increase till 5% per trading pair.

System will not open new trades before and after important economic news. It uses high impact news filter and never trade before and after high impact news time.
