

Investment Strategy

NiLe strategy was built in 2015. From September 2015 working on a real money accounts. The system is built specially for medium to high risk trading portfolio. NiLe is an automatic trading system with no human interference.

NiLe trades on 12 pairs, but not at the same time. Integrated Money Management system automatically set necessary lot depending on deposit without trader interference.

The trading system open trades using support and resistance levels and also 3 inbuilt indicators. The system starts to trade in night time (GMT) after broker rollover with pending orders. Then tries to close all orders in profit till end of London session. If it is not possible and market goes against our trades, then NiLe goes in recovery mode and use they own mathematical algorithms to close trades basket in small profit.

Risk Management

NiLe has a 2 level risk management system to protect invested funds. One trade risk level is set to 2%. In recovery period it can increase till 6% per trading pair.

System will not open new trades before and after important economic news. It uses high impact news filter and never trade before and after high impact news time.
