4. GENERAL SPECIFICATIONS & CONDITIONS

4.1. Margin Call & Stop Out

Margin Call is set to 100% and Stop Out at 30%. A **margin call** is a warning from the platform that your trading account is at risk due to floating losses. This happens when your equity divided by your used margin—drops to 100%. When a margin call is issued, you'll see a notification on your platform indicating that you need to either add more funds or close some of your losing trades to prevent further losses. You may also be restricted from opening new positions.

The Yadix brand is operated by Quantix FS Limited, a Financial Services Company, authorised and regulated as a Securities Dealer by the Financial Services Authority of Seychelles ("FSA") with license number SD021 with its registered office at Room B11, 1st Floor, Providence Complex, Providence, Mahe, Seychelles.

If your floating losses continue to increase and your Margin Level falls to an even lower, 30% percentage, a stop out is triggered. This is an automatic process where the platform begins to close your open positions, starting with the biggest loser. The system will continue to close positions until your Margin Level rises back above the stop-out level. This automated feature acts as a crucial safety net, preventing your account from going into a negative balance and ensuring your losses don't exceed your initial deposit.

4.2. Trading Fees & Commissions

The Scalper ECN account commissions are charged at \$/€ 3.50 per 100,000 traded for low cost and reliable access to robust liquidity that delivers accuracy and reliability.

4.3. Margin Leverage & Margin Requirements

Leverage is a powerful tool that allows traders to reduce the capital needed to enter a higher volume Forex trade. Flexible leverage from 1:1 to 1:500 so that traders have greater trading capabilities and risk controls.

For example, a trader with a balance of 1,000 and leverage of 1:500 can open an order of 500,000 (0.5 lot), yet with 1:1 leverage and the same capital a trade size of 1000 (0.01 lot) is possible.

Therefore, the profit or loss from this trade will reflect the higher volume traded that

The Yadix brand is operated by Quantix FS Limited, a Financial Services Company, authorised and regulated as a Securities Dealer by the Financial Services Authority of Seychelles ("FSA") with license number SD021 with its registered office at Room B11, 1st Floor, Providence Complex, Providence, Mahe, Seychelles.

leverage allows. Higher leverage can multiply potential profits, but can also lead to greater losses and therefore, proper risk management is advised.

Leverage and margin levels are subject to change at any time without prior notice according to underlying market conditions and at the sole discretion of the company.

4.4. Best Bid & Ask Pricing

We use 14 different liquidity banks to execute your trades. This means the prices you see on the MT4 chart always reflect the **best Bid and Ask prices** available in the market.

This execution model is especially helpful during periods of high volatility. If one bank has a good Bid price but a poor Ask price, and another has the opposite, our system combines the best of both. This guarantees you'll always get the lowest possible execution prices.

4.5. Order Execution Flow

We offer an execution model with no conflicts of interest, creating a better environment for high-frequency traders, scalpers, and those who use Expert Advisors.

When you place an order, it goes from your platform to our servers. From there, it's

The Yadix brand is operated by Quantix FS Limited, a Financial Services Company, authorised and regulated as a Securities Dealer by the Financial Services Authority of Seychelles ("FSA") with license number SD021 with its registered office at Room B11, 1st Floor, Providence Complex, Providence, Mahe, Seychelles.

instantly matched and sent to the liquidity bank with the best Bid/Ask price. This process ensures speed, accuracy, and low pricing.

To protect your trading strategy, the execution venue only receives an anonymous request to buy or sell. They never see any details about your stop loss, take profit levels, or personal information. Conflicts of Interest order execution flows give high frequency strategies, Expert Advisors, Scalpers and profitable traders the environment needed to succeed and maximise efficiency.

4.6. **Account Denomination Currencies**

The account denomination currencies are **USD** or **EURO**.

4.7. **Rollovers**

Rollovers are calculated and debited or credited for all orders that are left open overnight. In Forex, the end of the trading day is always set to 22:00 GMT each day.

Rollover, or swap, is the interest a trader pays or receives for holding a forex position overnight, calculated based on the interest rate differential between the two currencies in a pair. If you buy the currency with a higher interest rate, you'll generally receive a credit, while buying the currency with a lower interest rate will result in a debit. This amount is influenced by your position size. A key exception is the "triple swap" on Wednesday, where rollover is multiplied by three to account for the weekend, as the forex market

operates 24/5.

4.8. Order Confirmations

All successful trades are confirmed on screen, typically within milliseconds. Full transaction details can be accessed from your platform. Details include date, time, price, bought or sold, the monetary value and a unique order number (ticket).

4.9. Reporting

Our trading software provides real-time tracking of all your trading activity. You can instantly view open positions, real-time profit and loss, margin availability, and account balances directly on-screen.

Under the "Trade History" tab in the platform, you can also access a comprehensive report of your trading history. This includes detailed information for every order, such as:

- Open and close times
- Open and close prices
- Trade volumes
- Symbol
- Stop Loss (SL) and Take Profit (TP) levels

The Yadix brand is operated by Quantix FS Limited, a Financial Services Company, authorised and regulated as a Securities Dealer by the Financial Services Authority of Seychelles ("FSA") with license number SD021 with its registered office at Room B11, 1st Floor, Providence Complex, Providence, Mahe, Seychelles.

- Swap charges
- Final profit or loss

4.10. **Account Statements**

You can view your account statements and generate detailed reports at any time by navigating to the "Account History" section of the trading platform.

You have the flexibility to generate reports for any specific date range, and these can be printed or saved for your records. For more details on all available reporting features, simply access the "Help" tab within the MetaTrader platform.

The Yadix brand is operated by Quantix FS Limited, a Financial Services Company, authorised and regulated as a Securities Dealer by the Financial Services Authority of Seychelles ("FSA") with license number SD021 with its registered office at Room B11, 1st Floor, Providence Complex, Providence, Mahe, Seychelles.
