

Strategy

“Low risk EA trading targeting 15% per month by trading on two major pairs, identifying trends on medium time-frames.”

Fully automated trading that focuses on EUR/USD and GBP/USD H1 time-frames to identify profitable trends and executing trades. The EA uses hidden stop loss and take profits to keep trading balance and accounts protected with the lowest risk possible.

Risk Management

As the EA is a trend following EA, it does not use martingale systems nor scaling systems to reduce the risk and provide consistent performance. Low profit taking targets are in place to ensure that open trade times are limited and to protect against breakout trends. Trading during news is avoided for extra safety.

The system does not use any trade multipliers, martingale or any breakout strategies that can be classed as higher risk but focuses on analyzing the H1 charts to identify profitable trends and to generate consistent profits and low drawdown. Hidden SL and TP are used for extra protection.

Strategy Performance Highlights
Method: EA or Copier
Risk: Low
Investment: \$1,000
Total Winning Trades: 76.79 %
Maximum Drawdown: 3.79 %
Growth:+ 16.74%
Performance Fee: 0%
