

Investment Strategy

“Fully Automated EA that operates on specific indices with extraordinary results of +21.6% weekly.”

This automated trading strategy focuses trading on the popular DAX index and other Indices, to deliver very high returns in a very short space of time.

The system opens two positions in the opposite directions (hedged), this reduces the initial risk as the account will benefit from zero margin used for the trades opened. Once the symbol takes a direction, the EA identifies the price action and will close the weak position and maximize the profit of the strong position making the strategy efficient and profitable. The strategy works well with \$500 or more balance, with a starting balance of \$1,500 you can experience very high returns.

Risk Management

The strategy includes hidden stop loss and take profits to keep trading balanced and trading controlled.
