4. Important Information

4.1. *Leverage & Margin*

Leverage is a powerful tool that allows traders to reduce the capital needed to enter a higher volume Forex trade. Yadix offers flexible leverage from 1:1 to 1:500 so that traders have greater trading capabilities and risk controls.

For example, a trader with a balance of 1,000 and leverage of 1:500 can open an order of 500,000 (0.5 lot), yet with 1:1 leverage and the same capital a trade size of 1000 (0.01 lot) is possible. Therefore, the profit or loss from this trade will reflect the higher volume traded that leverage allows. Higher leverage can multiply potential profits, but can also lead to greater losses and therefore, proper risk management is advised.

Leverage and margin levels are subject to change at any time without prior notice according to the underlying market conditions and at the sole discretion of the company.

4.2. *Best Bid & Ask Pricing*

As the Company uses multiple liquidity banks as execution venues for client's trades, the price on the MT4 chart will always reflect the best bid and ask prices available in the market. This execution model is beneficial to traders, especially during periods of high market volatility as one bank may offer a competitive Bid but poor Ask price, and another bank may offer an excellent Ask but poor Bid price, the combination of the best Bid and Ask prices from different banks ensures traders will always benefit from the lowest execution prices.

4.3. *Order Execution Flow*

No conflicts of Interest order execution flows allow high frequency strategies, Expert Advisors, Scalpers and profitable traders the environment needed to succeed and maximise efficiency. Orders are submitted from the trader's platform to the Yadix servers, from there the order is matched and instantly executed to the co-located liquidity bank offering the Best Bid/Ask price to ensure speed, accuracy and low pricing.

The matching execution venue receives an anonymous demand to simply buy or sell the market execution position at the price requested with no details of stop loss, take profit levels and no client details to always ensure full protection.
