4. Important Information

4.1. *Commissions*

Commissions apply for indices: Scalper and Pro \$/€1.5 per round lot traded. The Classic account has no commissions

4.2. *Indices Leverage & Margin*

Leverage for Indices trading is up to 1:100. To effectively display the movement of profit/loss on Indices, the Company has established a minimum/incremental trade size as detailed above. Margin required is calculated in the Currency the Instrument is denominated in.

Clients can change the leverage of their accounts by logging in to the client area and selecting to change leverage/margin. Leverage cannot be changed whilst there are open orders.

The Leverage/Margin level is subject to change at any time without prior notice according to the decision of the company.

4.3. *Indices- Calculating Margin*

Margin Requirement for Indices = (Volume [contract size of 1 lot] x Price)/leverage.

For example, if 1 lot of NASUSD with leverage of 1:100 and Price is 6797

Margin Requirement = (1lot [1 contract] = 1 x 6797 / 100 = USD 67.97
